

Statistical Analysis of Intra-firm Data:

Opportunities and Challenges for the Private Sector,
Academic Research and the Provision of Higher Education

May 24 – 25, 2016

Copenhagen Business School

Call for Papers

With advances in computer technology, electronic systems have replaced paper files to a large extent in most firms. A wealth of data is being produced in operations by all sorts of business. This interdisciplinary conference brings together leading practitioners from firms, academic researchers in the area of applied statistics and decision makers in university management and the government to discuss new opportunities and challenges for firms, research and the provision of higher education that evolve from technological change. Academic researchers are invited to submit research papers in the area of statistical analysis of intra-firm data. Ideally, this research benefited and impacted the decision making process in firms.

Please submit your paper under: firm_data@cbs.dk

Submission deadline: Friday 4 March 2016

Notification of acceptance: end of March 2016

A budget for travel expenses and accommodation is available

CBS scientific committee: Gorm Gabrielsen, H.C. Kongsted, Lisbeth La Cour, Dolores Romero Morales, Ralf A. Wilke.

The conference is supported by the Danish Society for Education and Business (DSEB) and the Reinholdt W. Jorck and Hustrus Foundation.

Conference organisers:

Ralf A. Wilke, Department of Economics

Alex Pauly, MSc. Advanced Economics and Finance
